

BOOST
ZEM CAPILLARY

Hair bio-stimulation and implantology to restore hair health and density.
A medical approach that combines precision, science, and aesthetics to revitalise from the root.

OBJECTIVE Repair, strengthen, and protect the hair, restoring shine, softness, and vitality while stimulating natural growth and preventing hair loss.

METHODOLOGY Comprehensive treatment under medical supervision in trichology and dermatology. Combines regenerative techniques to repair damage and create a protective barrier against external aggressors.

WHO IS IT FOR? For those seeking to revitalise their hair or experiencing hair loss related to stress, hormonal imbalances, or dermatological and metabolic conditions.

WHAT DOES IT INCLUDE? Medical assessment and personalised regenerative therapies combining diagnosis, bio-stimulation, and hair implantology techniques.
